

SF245CC - SANDFILTER

Sand Filters are required before discharging water into any aquatic habitats.

At Stormtec, we carry a wide range of Sand Filters that vary in flow rate, tank size, and other specifications. Each Sand Filter system can stand alone or be used in combination with additional equipment.

Sand Filter unit includes a fitted 230V Control Panel, 10hp pump, three 30" filter tanks and an optional pH control that maintains a pH range of 6.5-8.5, with automatic carbon dioxide injection, auto shutdown, and other dispensing features. Also includes optional liquid flocculent injection.

SF245CC is constructed inside an insulated shipping container, ideal for long term projects susceptible to cold weather and/or vandalism.

FEATURES

- Backwash controller that allows automatic backwash intervals (by time and/or pressure).
- Automatic float control.

MATERIAL SPECIFICATIONS

MODEL	SF245CC
FLOW RATE	150 GPM
TANK SIZE	30"
DIMENSIONS	8'L x 8'W
DRY WEIGHT	6,500 LBS
POWER REQUIREMENTS	230V 50A Single Phase
