

PT1500 - POLYETHYLENE HOLDING TANK

For on-site storage of potable water, storm water, sediment filled water, or contaminated water.

Available in a variety of shapes and sizes to accommodate a wide range of water storage on site, Stormtec offers polyethylene holding tanks that are high-strength, light-weight, and corrosion-resistant. Polyethylene tanks are able to be combined and configured in multiples, and are easy to maneuver and set up on any project site.

FEATURES

- Housing constructed out of polyethylene.
- Vertical storage.
- Light weight.
- Easy to move.
- Flexible footprint when configured in multiples.
- Rigid industrial enclosure.
- UL approved components.
- 6" bulkhead fitting.
- 3" mid drain valve.
- 2" bottom drain valve.

MATERIAL SPECIFICATIONS

MODEL	PT1500
HOLDING CAPACITY	1,500 GAL
DIMENSIONS	4'9" Diameter, 8'11"H
DRY WEIGHT	275 LBS
