

## **Field Technician – Pumping Solutions (Delta, B.C.)**

A leader in environmentally conscious water management solutions in Western Canada with offices in B.C. and Alberta has need for a mechanically-inclined Field Technician with construction experience. The role requires working out of town approximately 60% of the time on dewatering and bypass projects in BC/Alberta/ Saskatchewan and 40% working primarily in the metro Vancouver area. Will appeal to candidates who like working outdoors with a good team, on construction sites and aren't afraid of getting their hands dirty.

Stormtec is a specialty water management company that makes the lives of their customers easier by taking on their water management challenges. When we do it right, no one notices us doing our work – not our customers, not the communities we work in, not the fish in the local streams. Except that our customers realize we don't have the ongoing headache of water management. We provide water management solutions for sediment control, contaminated water treatment, dewatering and bypass solutions in the construction industry.

We've doubled in size over the last three years and expects to double again. We have a young, progressive team of 60 staff, led by an ambitious President & CEO who is leading the company through unprecedented but sustainable growth.

People who succeed at this job will:

- Install, operate and maintain various pumping systems (i.e. bypass pumping, deep well and well point dewatering) as part of a team, on construction sites. Must be able to lift 50 lbs.
- Perform service on diesel pumps in a safe and effective manner
- Perform hose/pipe testing and installation
- Troubleshoot and repair various types of pumping equipment
- Comprehend dewatering and fluid pumping systems, filtration system drawings
- Perform duties safely to comply with safety regulations including the use of hand and power tools
- Prepare Field Service Reports on time
- Communicate with customers, contractors effectively

Skills and Related Experience

- Minimum 2+ years of previous work experience preferably within the construction industry.
- Highly desirable credentials include: Certified Telehandler/ Zoom Boom Operator license, Fall Protection, Basic Slings and Rigging Course, Excavation Safety Training.
- Work well under pressure (internal and external), in a team and independently
- Strong verbal and written English proficiency
- Willingness to work overtime, on call, particularly during raining season
- (Water transfer, dewatering experience from oil & gas, fracking industry is ideal and we will pay more than stated hourly rate for this direct experience)

## **OTHER STUFF**

There's no doubt that you'll face some challenges; but you will be up for it because of your strong work ethic, and pride in your work. We have a career ladder, so do well, acquire more skills and proficiency and you can position yourself for career progression as other field tech roles becomes available as the business grows.

The workweek is Monday to Friday, 7:30 a.m. to 4:00 p.m., 40 hours per week. Ability to work some overtime after hours or be on call on the weekends, especially during our rainy/ busy season (September to April), is necessary as well as the ability to work out of town in Western Canada 60% of the time. (For out-of-town work, we provide transportation, daily meal allowance and accommodations.)

An offer of employment is dependent on reference checks with direct managers, criminal record check, drug testing including THC, good driving history. Canadian work authorization is required.
