

BF200 - DOUBLE BAG FILTER

For use in a wide range of low and high flow filtration applications, commonly required for contaminated water treatments, sediment control, or industrial applications.

All Stormtec Bag Filters are designed for high solids holding capacity, and each system can stand alone for sediment removal or be used in combination with filter equipment. There are no moving parts, and each Bag Filter system is skid-mounted for easy handling and installation.

All replaceable Bags Filters are available from 500 to 1 Nominal or Absolute Micron.

*cartridge filters also available upon request.

FEATURES

- Steel construction.
- 125 psi maximum operating pressure.
- Bag filter chamber connected in parallel.
- Fitted with bleed valves and pressure gauges.

MATERIAL SPECIFICATIONS

| MODEL | BF200 |
|------------------|---|
| HOLDING CAPACITY | TWO (2) 7" x 30" FILTER BAGS, DOUBLE-STITCHED |
| DIMENSIONS | 4'L x 3'W x 5'6"H |
| DRY WEIGHT | 800 LBS |

* Bag Filter flow rate capabilities vary due to effluent characteristics.
