

TW275C - TRUCK & TIRE WASH

For cleaning the tires of trucks when leaving an industrial or construction project site, to control and eliminate the debris or contamination of public roads.

Stormtec truck and tire washes are able to meet a wide range of specifications for projects of all sizes. Installation is made in ground, to accommodate light or heavy duty trucks, for either temporary or permanent applications.

Dirt and debris from the collection tanks may be removed by an automated conveyor system, backhoe loader, or vacuum truck.

FEATURES

- 45 tonne maximum load.
- Magnetic sensors with automatic distance sensing for optimum performance.
- Automatic or manual control panel operation.

*Please confirm dimensions with a Stormtec Representative
